

LABELLING

AND CERTIFICATION

CONTEXT

You need to demonstrate your commitment to CSR to your stakeholders. CSR labelling or certification is an effective way of proving your commitment and performance in terms of sustainable development, but also of stimulating the transformation of your organisation.

OUR MISSION is to support you in your CSR labelling or certification process. We will help you throughout the labelling or certification process.

With the proliferation of standards and reference frameworks, our first concern will be to guide you towards the optimum solution for your company.

OUR APPROACH

- Getting to know the organisation
 - Understanding objectives, constraints and ambitions
 - Help in choosing the solution
 - Action plan to achieve the standards required for labelling or certification
 - Implementation and monitoring of action plans
- Communication strategy

OUR ADDED VALUE is based on our knowledge of the business world and our ability to go further by taking into account the non-financial issues and challenges facing your business. We can provide you with concrete, operational recommendations to improve your overall performance.

A local approach to your operational challenges

A rigorous, structured service shared with you to ensure a high-performance approach. Depending on your needs, we can work on your premises or in our offices.

Quality, ethics, confidentiality

We are committed to ensuring that these principles are respected and that we are totally independent.

More than just figures

Value-added reporting, ongoing technical and regulatory monitoring to anticipate and prepare for change

A multidisciplinary ecosystem

Our organisation is part of a rich and diverse ecosystem that directly benefits all our stakeholders, and in particular our customers.

A resolutely digital approach

The information systems that underpin our financial reporting are quickly taken on board by our staff.

Measure. The aim is to measure the company's overall performance by including non-financial aspects. Relevant measurement requires method, reliability and integrity.

Act. The right measure authorises the right action.

Transform. Because we measured and acted at the right time, in the right tempo, in the right direction, transformation can happen.
